

Small countries: Cyprus, Estonia, Lithuania, Latvia, Malta, Slovenia

Dear Students,

A group of small countries is made up of euro area and non-euro area countries? Are you able to establish a common position? Are small countries at all able to block decisions in the RUE? What is their driving power?

Please consider the issue of arguments in your narrow circle- perhaps there is something crucial enough for you to negotiate the terms of support for ESM funding?

Small countries: Cyprus, Estonia, Lithuania, Latvia, Malta, Slovenia
